DUE TO A DEMAND FOR MANY TREES DUG  
BALLED IN EARTH WE ARE LISTING BOTH  
BARE ROOT AND BALLED AND BURLAPPED.

**\*IMPROVED COOLSHADE**

U. S. PLANT PAT. NO. 1747

**EXTREMELY HARDY** — survives drought conditions, transplants easily, highly resistant to insects and diseases.

**UNUSUALLY TOUGH** — very resistant to breakage from strain of ice or wind.

**MOST SERVICEABLE** — produces a quick shade, may be planted close to residences without danger of heavy over hanging limbs, is uniformly branched and densely foliated.

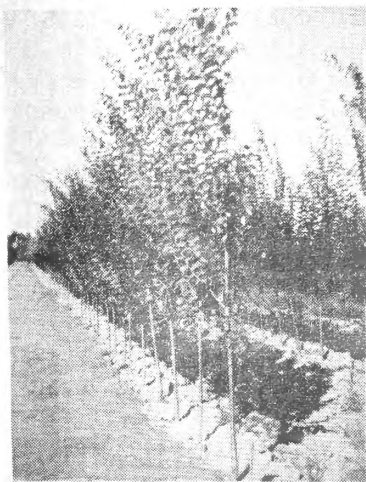

**HANDSOME AND STATELY** — compact, grows rapidly without producing an unsightly whippy top and has a non-crotching straight central trunk.

**EXCELLENT LAWN TREE** — grows to a medium height (35 to 50 ft.), very tolerant of soil conditions, leaves 3 to 3½ inches long of a lively green color.

# A SENSATIONAL NEW "FIRST" IN QUICK SHADE

- First Hybrid Elm to receive a United States Plant Patent.
- First selection of an improved form of the original Elm Coolshade introduced in 1946.
- A first in a rapid growing tree that can be recommended to compete with hard wood qualities.

**NEW  
HYBRID ELM  
IMPROVED  
COOLSHADE  
VAR. PRIMUS**

**Note straight trunk and even distribution of branches**

\* Patented and introduced by

## LIROPE

Lirole (Ophiopogon) is the answer where an easily grown disease resistant border plant is needed—it is indifferent as to soils and it grows in sun or right up to trees in shade. Foliage is grass like but broader, grows 12 to 15 inches and produces attractive lavender-purple flowers on spikes during late summer and fall. For landscape work, borders, planters, or containers. Hardy, semi-evergreen. Per 10 \$4.50: Per 25 \$10.00 Clumps in 1 qt. containers .75 ea.

## Strawberry Plant Price List

No other fruit gives such quick results as Strawberries. Planted one spring, they give a full crop the next, and with proper care a patch lasts several years. Plant 2 feet apart in the row, the rows 3½ to 4 feet apart; planted 2x4 feet requires 5,400 per acre. These plants are well rooted, properly cleaned and carefully packed. All varieties listed are perfect flowered and will bear alone.

All plants listed are grown from **VIRUS FREE** foundation stock, and have been twice State Inspected. Each bunch of 25 plants labeled. Our plants are freshly dug from the field. Prices are FOB Sarcoxie.

from drawing the plans to delivering  
and planting the plant material.

You will be surprised at the saving that can be made and the beauty attained by having your property planned systematically by a Landscape Specialist.

## A Well Planned Home Is a Home of Distinction

Within a radius of 75 miles we will be glad to have our Landscape representative call and go over your problems. Measurements can then be made, the plans drawn and submitted for your approval. For this service we make a charge of \$10.00 for an ordinary size lot. This amount is credited on your order at the rate of 10% of the plant material purchased. For instance, if your order amounts to \$100.00, your plan has cost you nothing. Estimates gladly made without charge.

For larger properties and special problems, costs are made accordingly.

Properties located over 75 miles distant, ask for prices. Any plant material we deliver and install is replaced without charge if loss is reported to us prior to July 1st. following planting date.

# Upright EUONYMUS RADICANS

(SARCOXIE)

UPRIGHT  
EUONYMUS RADICANS  
*Trained as a Column,  
Lightly Sheared*

*Natural growth  
not sheared or  
trained.*

- A New Broadleaf Evergreen
- Hardy as the Oak, throughout the U. S.
- Glossy leaves about one inch long
- Compact and definitely upright
- Excellent for those "hard to grow" places
- Grows rapidly, transplants easily
- Happy in full sun, thrives in dense shade

UPRIGHT EUONYMUS RADICANS was developed by us a few years ago for a specific need—a truly hardy Euonymus that would stand hot, dry summers and varied winter conditions. Nationally advertised by us in American Home, Flower Grower, Popular Gardening and other garden magazines, the plant has been distributed to many parts of the country, with favorable reports from even the most northern areas. Some defoliation in the extreme North, replaced with bright new foliage early spring.

USED FOR SPECIMENS OR IN GROUP PLANTINGS. Normally grows 3½ to 4 ft. Can be grown in a column 5 to 6 feet high by driving a steel reinforcing stake through the center of the plant. The new growth will attach itself with the tiny root-like hold fasts, extensive tying is not necessary.

EXCELLENT FOR HEDGES. Small hedging plants are available. Plant 1 foot apart in the row and keep trimmed, may be kept as low as 1 foot. These compact hedges remind one of the Boxwood, and are much less expensive.

PERFECT AS EVERGREEN VINES. Evergreen vines are attained by planting the small plants close to brick, stone or concrete supports. They will attach themselves by the new growth, fingering out in a beautiful evergreen pattern.

TRULY A HARDY VERSATILE PLANT THAT HAS ATTRACTED ATTENTION FROM PLANT LOVERS ALL OVER THE COUNTRY.

## PRICES OF UPRIGHT EUONYMUS RADICANS

# A SENSATIONAL NEW "FIRST" IN QUICK SHADE

- First Hybrid Elm to receive a United States Plant Patent.
- First selection of an improved form of the original Elm Coolshade introduced in 1946.
- A first in a rapid growing tree that can be recommended to compete with hard wood qualities.

**NEW  
HYBRID ELM  
IMPROVED  
COOLSHADE  
VAR. PRIMUS**

**\*IMPROVED COOLSHADE. U. S. PLANT PAT. NO. 1747**

**EXTREMELY HARDY**—survives drought conditions, transplants easily, highly resistant to insects and diseases.

**UNUSUALLY TOUGH**—very resistant to breakage from strain of ice or wind.

**MOST SERVICEABLE**—produces a quick shade, may be planted close to residences without danger of heavy over hanging limbs, is uniformly branched and densely foliated.

**HANDSOME AND STATELY**—compact, grows rapidly without producing an unsightly whippy top and has a non-crotching straight central trunk.

**EXCELLENT LAWN TREE**—grows to a medium height (35 to 50 ft.), very tolerant of soil conditions, leaves 3 to 3½ inches long of a lively green color.
